

Ideation Phase

Customer Journey Map (Detailed)

Project: Freelancer Web Application (MERN Stack)

Introduction

A Customer Journey Map is a visual representation of the steps a user takes while interacting with a product or service. It helps in understanding user experience, identifying pain points, and improving overall system design. This map follows stages such as awareness, interaction, engagement, and post-experience.

Based on the provided template `filecite\turn5file0`, the journey is divided into phases like Entice, Enter, Engage, Exit, and Extend.

Customer Journey (Freelancer Perspective)

Stage	User Action	Experience	Pain Points	Opportunities
Entice	Sees platform ads/social media	Interested & curious	Not aware of trust	Add testimonials
Enter	Visits website/app	Explores UI	Confusing navigation	Improve UI/UX
Engage	Creates profile & applies	Excited to work	No response	Add notifications
Exit	Completes project	Satisfied	Payment delays	Secure payments
Extend	Gets reviews & new jobs	Motivated	Low visibility	Recommendation system

Customer Journey (Client Perspective)

Stage	User Action	Experience	Pain Points	Opportunities
Entice	Searches freelancers	Exploring	Too many options	Smart filters
Enter	Posts job	Hopeful	Complex process	Simplify posting
Engage	Reviews bids	Decision making	Trust issues	Verified profiles
Exit	Completes hiring	Satisfied	Quality concerns	Rating system
Extend	Hires again	Loyal	Limited suggestions	AI recommendations

Conclusion

The Customer Journey Map highlights the experiences, challenges, and opportunities at each stage. These insights help in designing a user-friendly and efficient Freelancer Web Application using MERN stack.
